

See us at Offshore Decommissioning Conference, Stand No: 8

A UK First for Decommissioning Market

A specialist team of companies have come together as part of their commitment to deliver an approved decommissioning programme under one collaborative offering. Integrated DECOM will offer independent front-end engineering and environmental solutions providing integrated support for oil and gas operators looking to retire redundant facilities without the burden of an in-house overhead.

With over 20 years' expertise and knowledge of successfully delivering the major UKCS decommissioning projects to date, Costain, Axis Well Technology, BMT Cordah and DNV GL have the capability and capacity to deliver the entire decommissioning work scope up to the approval of the project's decommissioning programme, from subsurface to structure, through a single point solution.

Frazer Mackay, of Costain who are leading the consortium says: "The companies within Integrated DECOM bring complementary, critical technical skills which are required to plan and deliver compliant and cost effective decommissioning. This unique combined knowledge ensures that every solution will be considered in a comparative assessment process, delivering a lower risk and cost decommissioning outcome for owners and stakeholders."

Integrated DECOM will be at Stand number 8 at the Offshore Decommissioning Conference in St Andrews on the 15th and 16th November.

-Ends-

Notes to Editors:

About Costain

Costain is a leading engineering solutions provider delivering integrated consulting, project delivery and operations and maintenance services, with a portfolio of achievements spanning 150 years of innovation and technical excellence. Costain meets essential national

needs by providing world-class engineering and technology-led solutions to our customers in the energy, water and transportation markets.

About Axis Well Technology

Axis Well Technology (Axis) is an independent consultancy providing fully-integrated well technology and reservoir development services for the UKCS and internationally.

Axis provides specialist expertise for the complete asset lifecycle, from exploration, appraisal and the initial phases of field concept design, through to development planning, well operations, production / reservoir management, and decommissioning and well abandonment.

With a broad cross-discipline competency, extensive operational and technical experience, Axis delivers quality results that are innovative, fit-for-purpose and achievable.

About BMT Cordah

BMT Cordah is a leading multi-disciplinary environmental consultancy with extensive experience in providing support to decommissioning programmes. Having been involved in many offshore programmes since 1994, we have successfully delivered a range of services, including; preparation of environmental scoping reports; full EIAs; detailed estimates of energy usages and gaseous emissions; Comparative Assessments of pipelines and BPEOs; in-depth environmental support to decommissioning engineering teams; Comparative Assessments of options for decommissioning structures that are candidates for derogation under OSPAR 98/3; prepared PONs, PWAs, and Consents to Locate; and compiled full Decommissioning Programmes for Consultation before facilitating the submission of formal Decommissioning Programmes to the Secretary of State.

The company has offices in Aberdeen and London.

About DNV GL

Driven by our purpose of safeguarding life, property and the environment, DNV GL enables organizations to advance the safety and sustainability of their business. Operating in more than 100 countries, our professionals are dedicated to helping our customers in the maritime, oil and gas, energy and other industries to make the world safer, smarter and greener.

About DNV GL – Oil & Gas

In the oil and gas industry, we enhance safety, increase reliability and manage risks in projects and operations. Our oil and gas experts offer local access to global best practice in every hydrocarbon-producing country. Driven by a curiosity for technical progress, we provide a neutral ground for collaboration; creating competence, sharing knowledge and setting industry standards. Our independent advice enables companies to make the right choices. Together with our customers, we drive the industry forward towards a safe and sustainable future.
